

## 12d Model – Macro Label Grades on Apply Many Kerb strings

12d User Forum Open Source

[http://forums.12dmodel.com/macro\\_view.php?m=99](http://forums.12dmodel.com/macro_view.php?m=99)

Label kerb grade based on Super Alignment reference string (road centreline) where kerb/link doesn't follow centreline geometry. Labels are placed only at special chainages.

This is a function and can be recalculated in chains.
